DETAILED ACTION

1. Claims 1-7, 17-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference number 43 cited in page 6, line 16, and page 8, last line. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: in page 6, line 18, "the conventional nozzle member 13" should read -- the conventional needle valve member 13--; and at the last line, "valve member 12" should read -- valve member 13--. Page 10, line 15, "Grooves 374" should read --Bores 374--.

Appropriate correction is required.

4. The specification is objected for failure to disclose the limitations such as: "a cylindrical male mating surface" and "a cylindrical female mating surface" claimed in claim 9.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 9, 22, 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In lines 4 and 5, the limitation "said cylindrical female mating surface mate to said nozzle insert" is not clear as to what cylindrical surface applicant referred to (i.e. nozzle insert or the tube). In claim 31, line 1, "claim21" should read --claim 30--.

7. For the purpose of this Office action, the claims will be examined as best understood by the examiner.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 8, 10, 21, 23, 30, 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Sprado.

Sprado discloses a needle valve member for a fuel injector comprising: a nozzle insert 3 having an external valve surface 30 and an internal valve surface 31, a tube 4 irreversibly attached to insert 3, the tube 4 with a smaller diameter adjacent to the nozzle insert 3, and a larger diameter away from the nozzle insert 3.

Allowable Subject Matter

10. Claims 11-16, 24-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a fuel injector with a nozzle insert: Joachim, Bailey et al., Keiczek, Seifert, and Hapeman.
